

AllSense Mini

Optimal indoor environment must-have for

Real-time monitoring

Real-time monitoring of complex sensor values
such as temperature, humidity, CO2, and fine dust

Real-time alarm

Dangers from AI models
Predictive and Alarm Features

Temperature

Humidity

Carbon
dioxide

Fine dust

Fireworks
detection

Motion
detection

RFID & External
devices control

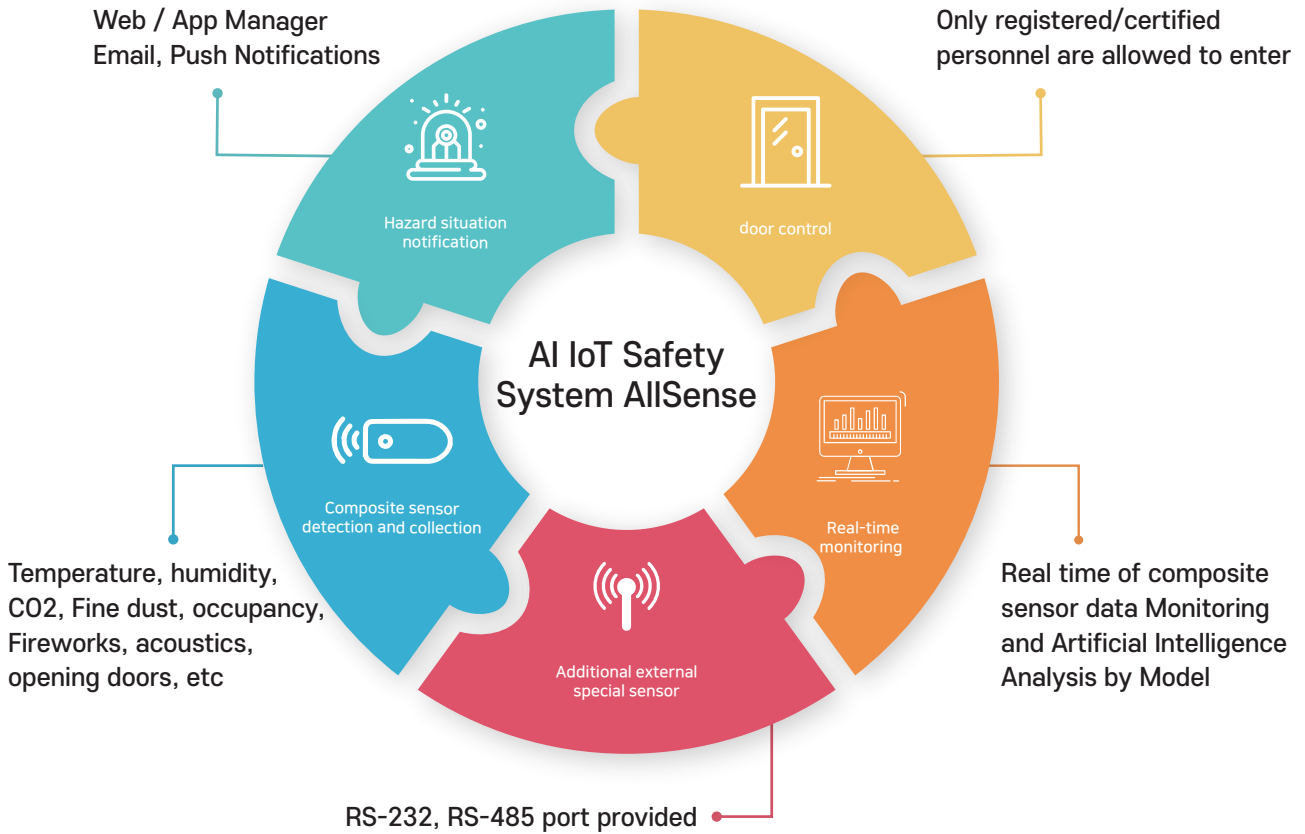

※ Additional options include RFID (for asset management and theft prevention), external device control (air conditioning operation and monitoring via the app).

Mini Introduction and Features

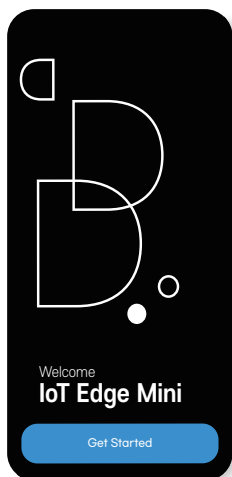

Analysis and Risk Prediction of Real-Time Sensor Data with Artificial Intelligence IoT Edge Technology
